

Amit Halbreich

Computer Science & Electrical Engineering (CS & EE) – Bachelor of Engineering

I'm currently looking for a Software Engineer / Algorithm Developer position. A highly motivated individual with excellent interpersonal skills, eager to work hard and contribute to the team's effort for the product's success.

📍 Jerusalem, Israel 📞 (+972) 507318899 ✉ amithalbreich15@gmail.com 🐙 github.com/amithalbreich15 🔗 linkedin.com/in/amit-halbreich-780a66173

🎓 Education

• The Hebrew University of Jerusalem | 2020–2024

Electrical Engineering & Computer Science graduate – have completed courses such as Data Structures, Algorithms & Complexity, Computer Architecture, Operating Systems, Neural Networks & Machine Learning, Big Data & Data Science, Object Oriented Programming, Image Processing, Computer Vision, Advanced Signal Processing.

Outstanding Engineering Final Project – Non-invasive Blood Pressure Measurement using IR Light & Image Processing.

• Har'el High School | 2011–2014

Graduated as an outstanding student, Completed high school with Certificate of Excellence. Elective classes (5 units each): Math, Physics, Chemistry, English Speakers Program.

💼 Work Experience

• QA Engineer at Cyberbit | 2018 – 2020

A key-member leading a group of a QA Engineering team which is responsible for Cyberbit's most successful product – "The Cyber Range trainer" – a virtual environment which demonstrates a vast organization's or company's network creating a simulation of real-life cyber-attacks various scenarios, training both SOC Team members with defending strategies and Penetration Testers. Responsible for the integration, system characterization and implementation. Experience in GUI design, Web and Application Software Testing and working with large databases. Experienced with working with PAN and Checkpoint Firewalls and Wireshark as part of my work and familiar with network protocols. Experience in writing STD/STP/STR detailed documents including various tests: Unit, Component, E2E, Integration, Regression, Performance Testing. I have worked closely to Software Developers and fixed major & critical bugs, wrote and maintained software documentation in English. Responsible for Automated Test Plans design, writing and execution.

✈ Military Service | Staff Sergeant

• Data Analyst & QA Engineer | IDF Intelligence Corps – Unit 8200 | December 2015 – August 2018

Team Leader, with experience in testing new operational Naval & Aerial Electronic Java based Intelligence system in advanced stages of development, as part of a co-operation of "Ofek" Computing Unit and 8200 Unit. Responsible for software improvements and configuration of a complete work environment of the new system version. As an expert system user – in charge of defining customer's needs working closely with software developers, providing instruction and guidance to end-users. Worked under a strict schedule in shifts as a Data Analyst providing crucial information that must be delivered flawlessly & accurately to relevant forces.

🛠 Professional Skills

Python Java JavaScript/Node.js C/C++/C# React Native/React.js HTML/CSS MySQL & PostgreSQL Databases Linux Matlab

⚙ Technical Skills

- Experience with Programming Languages: C, C++, C#, Java, Python Scripting, Linux & Shell Scripting.
- Software testing (QA) including GUI design. Familiar with MacOS, Windows, Linux OS.
- Experience in SQL, working with big & complex Databases, Cloud Services & Communication Networks.
- Experience working with "Jira" & "Confluence". Familiar with Agile & Scrum methodologies.
- Experience with Cyber-Security world, Vulnerabilities, Attack Scenarios, FW & SIM Systems.
- Problem Solving & Auto-deduction abilities – Learned Arduino, NodeJS, CSS, HTML, Javascript, C#.

🧠 Personal Skills

Auto-Didact Team Player Outside-the-box thinking Details-Oriented Design Patterns Interpersonal Communication

🌐 Languages

Hebrew (Mother tongue) English (Fluent)

🎮 Hobbies

Basketball Tennis Workout Robotics & Drones Guitar (Self Taught) Music & Concerts Hiking & Traveling
